

BUS TERMINAL MODIFICATION

This work order contract involved interior renovation of the Bus Station at the George Washington Bridge for The Port Authority of New York and New Jersey.

Renovation work included replacement of entry doors at twelve locations, new granite wall surfaces, terrazzo, ceilings, architectural elements and refurbishment of escalators.

Extensive upgrades to the HVAC lighting, and fire alarm systems were also completed while maintaining the daily operations of the station.

Additionally, extensive renovations and modification to the bus pull through platform were completed while maintaining bus traffic and passenger flow.
